

Product Documentation: PayPal StoreFront

The screenshot displays the PayPal StoreFront administration interface. On the left, there is a 'Shopping Cart' showing 0 items for \$0.00 and a 'DoNetNuke Modules' tree. The main content area features a search bar and a grid of product categories: E-Commerce (6), Listings (17), Portal Enhancements (8), and Services (6). On the right, the 'Store Admin' panel is highlighted with a red dashed border, containing sections for 'Category/Coupon Admin', 'Active Products', 'Bestseller Products', 'Best Sellers', 'New Releases', and 'Featured Products'.

There are 3 simple steps to set up this module.

1. Sign up for your PayPal account at <http://www.paypal.com>
2. Enter your PayPal email on Store Configuration page.
3. Start to add categories and products.

There are 2 sections in this documentation **Store Configuration** and **Store Administration**. The first one will go over all the store configurable options and the latter will walk you through how to add categories, manage products (specification, images, download files, related products, etc) as well as administer reviews and coupons. The Store Admin Quick Launch panel on the top right of the screen shot above will also be discussed.

1) Store Configuration

License Verification:

This first section is for license verification. Before configure PAYPAL STOREFRONT module, please enter PayPal Transaction ID for PAYPAL STOREFRONT purchase and Domain URL that you've installed PAYPAL STOREFRONT module, then click [Click here for License Verification](#). This is not necessary when you install PAYPAL STOREFRONT module on your local machine.

General:

	<input type="radio"/> Always Show <input checked="" type="radio"/> Show on Home only

Is downloadable products?

Select whether you want to use PAYPAL STOREFRONT module with downloadable product. This is one time setting and you will NOT be able to reselect it after save configuration. We do not recommend using the same store for both tangible and downloadable products at the same time due to the complexity of shipping calculation method via PayPal.

If Downloadable product is selected:

- Module will use transaction-based shipping with preset shipping charge of 0. (See also **Shipping Calculation Method**)
- No box to enter Shipping Cost when add new product. (See also **Add/Edit Product**)
- Can upload product files in Other-Tab. (See also **Add/Edit Product**)

Theme:

Select predefined color theme of the module. You may change look and feel for your store by modifying Custom.css file installed on (DotNetNuke | DesktopModules | J1_JediStore | Themes | Custom | Custom.css) and then select custom theme on the Store Configuration page.

of Sub Categories Listed:

Select to set number of sub categories (All or up to 10) shown under each category.

of Repeat Columns:

Select to set number of columns (Up to 10) of category and sub category shown in page.

Enable Paging?

Select whether you want to limit page size (number of listings shown in each page of category and sub category). Enter the number of listings you want to show in each page in **Page Size**.

Enable Sorting?

Select whether you want to enable sorting feature for listings.

Enable Category Drill Down?

When disabled, this will merge all the categories in the main datagrid. For the store that has a small number of products, this can be used to bypass users to the product listings without drilling down to each product category.

Enable Treeview?

Select whether you want to show Tree View Browsing, and you can enter Text, as HTML Tag, that you want to be displayed as a Header of this Treeview in the Root Text. You can also set the width (pixels) of the Tree View panel on the left to avoid the main datagrid to move to the right. (Also see **Left Column Width**)

Treeview Base Icon:

To customize your module's **Treeview Icon**, browse to the icon you want and then click Replace.

Note: Once Replaced and you want to return it to be Module Standard **Treeview Icon**, you will have to browse and replace with Standard **Treeview Icon**. In order to do this, you may save the Standard **Treeview Icon** file in your hard drive for further use before make any change.

After replace Icon, you may have to refresh the page, to clear browser cache, to make new Icon visible.

Breadcrumb Home Icon:

To customize your module's **Home Icon**, browse to the icon you want and then click Replace.

Note: Once Replaced and you want to return it to be Module Standard **Home Icon**, you will have to browse and replace with Standard **Home Icon**. In order to do this, you may save the Standard **Home Icon** file in your hard drive for further use before make any change.

After replace Icon, you may have to refresh the page, to clear browser cache, to make new Icon visible.

Left Column Width

Set the width (pixels) of the Tree View panel on the left, to avoid the main datagrid to move to the right. (recommended 150-200 pixels)

Center Column Width:

Set the width (pixels) of the Main Data panel. (recommended 650 pixels)

Right Column Width:

Set the width (pixels) of the Right panel. (recommended 150 pixels)

Enable Product Option Selection (DropDownList)?

Select whether you want to allow product option selection when you have more than one options for the same product with the same price. For example, you can set product options by sizes (small, medium, large, etc) or colors (red, green, blue, etc). If enabled, Product Options administration table will appear on **Specification Tab** of Add/Update Products pages. This section will allow store admin to manage picklists for options to appear above the list price on Product Detail page and Listing Grid (if enabled). Information for user selection will be automatically appended to the product name when the users either add product with his/her selection to the shopping cart or use BuyNow button to check out the product. (See also **Add/Edit Product / Specification**)

Enable Product Variation?

Select whether you want to enable Product Variation in **Product Detail Page** when you have any product with different options at different price. If enabled, Product Variations will be able to be added in **Others Tab** on Add/Update Products pages. (See also **Add/Edit Product / Others Tab**)

Enable Content Sharing?

Select whether you want to enable Content Sharing in **Product Detail Page** when you have two/many products that have the same information (Currently support only Images, Videos, and Reviews). If enabled, Content Sharing will be able to be setup in **Manage Listings** page. (See also **Manage Listings**)

Enable Also Bought?

Select whether you want to show list of Also-Bought items in **Product Detail Page**.

Enable Page Options?

Select whether you want to display Page Options in **Product Detail Page**. Page options are comprised of Print this page, Email this page, and Make an Inquiry.

Print Mode (Page Options)

Use in conjunction of “**Enable Page Options?**”, to choose how you want your listing page will be printed, Print the whole Webpage Or Print from Printable Version.

Show new icon for:

Enter how many days (from date posting initially created) to show New Icon for each new posting.

Enable New Release, Best Sellers, and Featured Products panel?

Select whether you want to display New Releases, Best Sellers, and Featured Products. Number of populated items and days (if applicable) are configurable. You will also have an option to show price, wrap text, set panel width, and choose whether you would like to display these lists on only main page or on every page.

Review

Review:	
Review Settings:	<input checked="" type="checkbox"/> Enable Review? <input checked="" type="checkbox"/> Require Authorization? <input checked="" type="checkbox"/> Enable Helpful option? <input type="checkbox"/> Require Purchase to review?
Cookie Interval (days):	<input type="text" value="14"/>

PayPal Operation Mode:

Select Live mode when you want to use PayPal to accept the payment for your product purchasing. Select Sandbox mode when you want to Test using PayPal as a payment method. The Sandbox is a safe testing environment where you can test PayPal features. You can find further information about PayPal Sandbox at: <https://developer.paypal.com/>

Enable Buy Now button?

Select whether you want to enable Buy-Now button to be displayed on product listings and **Product-Detail** page.

Shipping Calculation Method:

Important: To avoid confusions;

- Before set this PAYPAL STOREFRONT's Shipping Calculation Method, **Please ALWAYS “allow transaction-based shipping values to override the profile shipping settings” in your Shipping Calculations section of your PayPal account** (you still be able to choose using transaction-based shipping value or PayPal Built In Shipping Calculations through this PAYPAL STOREFRONT's Shipping Calculation Method). **To allow this,**
 - Login to your PayPal account
 - Go to My Account/ Profile Tab.
 - Under Selling Preferences, click to go into Shipping Calculations.
 - In the bottom of the page-under Miscellaneous, check the

- checkbox to allow transaction-based shipping values to override the profile shipping settings
- Downloadable products will only use transaction-based shipping with preset shipping charge of 0.
 - **This is one time setting.** You will NOT be able to change it after you save.

PAYPAL STOREFRONT’s Shipping Calculation Method setting will let you select whether you want to use transaction-based shipping value or PayPal Built In Shipping Calculations.

- A. By Using an individual transaction-based shipping value, you can assign shipping & handling cost for each individual product (per item) when you add product to PAYPAL STOREFRONT Module (*See also Add/Edit Product*);
- For example: S&H cost for Product A = \$3/unit
S&H cost for Product B = \$5/unit
- B. By using PayPal Built In Shipping Calculations, you will have an option to choose the Flat Amount or Percentage shipping calculation method in PayPal’s Shipping Calculations setting by
- Login to your PayPal account.
 - Go to My Account/ Profile Tab.
 - Under Selling Preferences, click to go into Shipping Calculations.
 - For Cost Method, choose the Flat Amount or Percentage

For example: choosing Flat Amount

S&H Cost	Price Range
\$5	\$0.01 - \$30
\$7	\$30.01 - \$50
\$10	\$50.01 - \$100
\$15	\$100.01 - and up

For example: choosing Percentage

S&H Cost	Price Range
20% of total amount purchase	\$0.01 - \$30
18% of total amount purchase	\$30.01 - \$50
15% of total amount purchase	\$50.01 - \$100
10% of total amount purchase	\$100.01 - and up

Allow note to be entered?

Select whether you want to enable message box to let buyer input message to seller while using PayPal.

Allow shipping Address to be entered?

Select whether you want to enable message box to let buyer input preferred shipping address.

PayPal Receiver Email:

Enter Paypal Email that you will use to accept the payment.

Currency Code:

Enter currency code that you want to use with PayPal Payment such as USD, EUR, CAD, etc. This code has to be compatible with PayPal currency code/currency-related settings of you PayPal account. In order to let module display appropriate currency sign, please double check that you have enabled/selected DNN supported locale that is compatible with this currency code. (To enable DNN supported locale, go to Admin/Languages Tab)

Success Message:

Enter message that you want to display to buyer in Purchase Information page when payment's completed. This message will be shown in Purchase Information email sent to buyer too.

Announcement:

Announcement:	
Enable Announcement:	<input type="checkbox"/>
Delay:	<input type="text" value="30000"/> Delay between message change is in milliseconds
Message 1:	<input type="text" value="Please add content"/>
Message 2:	<input type="text"/>
Message 3:	<input type="text"/>
Note:	Each message is 1500 characters max. Please do not skip the message order.

Enable Announcement:

To enable/disable Message Announcement at the top of Module.

Delay:

To set delay between message change in miliseconds.

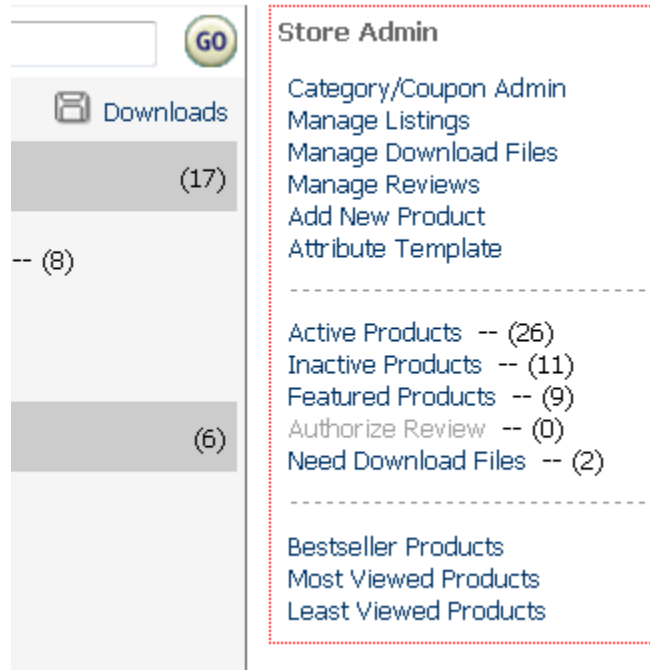

Announcement Message:

To compose Announcement Messages. You can have up to 3 sets of messages.

2) Store Administration

Store Admin (Quick Launch) Panel

This quick launch panel (on the top right of the module) will only be displayed to Host, Administrator, and users who have permission to Edit Module as an assisting links to do these administrative tasks:

Category/Coupon Admin

To create and organize product categories. (See also **Category Admin**)

To add and set up discount coupons. (See also **Coupon Admin**)

Manage Listings

See **Manage Listings**.

Manage Download Files

See **Manage Download Files**.

Manage Reviews

To authorize or delete reviews. (See also **Manage/Authorize Review**)

Add New Product

See **Add/Edit product**.

Attribute Template

See **Attribute Template**.

Active Products

To view all active products. (*See also Add/Edit product*)

Inactive Products

To view all inactive products. (*See also Add/Edit product*)

Featured Products

To view all featured products. (*See also Add/Edit product and Enable New Release, Best Sellers, and Featured Products panel?*)

Authorize Review

To view all products that have unauthorized review await for your approval. (*See also Manage/Authorize Review*)

Need Download Files (For Downloadable Products)

To view products that don't have File for buyers to download.

Bestseller Products

To view Bestseller products, configurable number of items. (*See also Enable New Release, Best Sellers, and Featured Products panel?*)

Most View Products

To view 10 most viewed products.

Least View Products

To view 10 least viewed products.

Category Admin

You have to create a category before you add any product. To create/organize/edit category,

1. Log in as an **Edit Role User**.
2. Go to Store Admin Quick Launch section on the top right corner of the module and click **Category/Coupon Admin**.
3. Click **Category Admin** tab

Once you're on **Category Admin** page:

Category Admin		Coupon Admin

Category has been updated.

- To create category,
 - Input Category Name
 - Select Parent Category (if applicable) from Drop-Down List.
 - Select whether you want to allow adding any new product to this category. If **Enable Listings?** is checked, you will be able to add new product to that category. On the other hand, if **Enable Listings?** is unchecked, new product will not be able to be added to that category. However, if you have some products that have been added and activated since previous setting, they still are able to be displayed. If you don't want to show these product listing, delete them or de-activate them. (See also **Add/Edit product**)
- To edit/reorganize category,
 - Click **Edit**.
 - Make any change
 - Click **Update** (or **Cancel** if you don't want to make any change).
- To customize an icon for any category,
 - Click **Edit**.
 - Browse to choose your own preferred Category Icon
 - Check **Overwrite Icon**
 - Click **Update**.

You have an option to activate/inactivate your customized category Icons; to do so please see **Show Custom Category Icon?**. (Samples of customized Icons used in this documentation are from <http://www.aha-soft.com>. They're not included in the module).

- To delete category, click . You cannot delete category if there are any product belong to that category.
- To view --all child categories (where available) and products-- belong to this category, click **View Product**.

Add/Edit Product

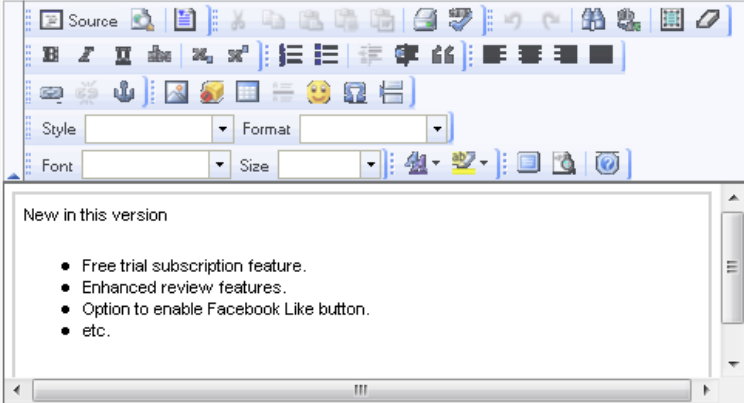

You have to create category before add any product. (See also **Category Admin**)

○ To add new product,

1. Log in as an **Edit Role User**.
2. Go to Store Admin Quick Launch section on the top right corner of the module and click **Add New Product**.

There will be four tabs/pages associated while add/edit product. Here are list and detail of them:

1. Product Tab

Product	Specification	More Images	Others

All required information in this tab has to be added and saved prior to go to other 3 tabs.

Product information that can be entered in this main Product-Page are:

- **Category (Required)**
You can select a category for new product from drop-down list (as mentioned above categories have to be created before add any product)
- **Product Name (Required)**
- **Product Summary**
Enter short summary for your product that you want to be displayed in the product listing grid.
- **Price**
 - **List price (Required)**
 - **Sales Price**
If Sales Price has been entered, product will be displayed with both List Price and Sales Price, and product will be sold at sales price
If Sales Price has NOT been entered, product will be displayed with List Price.
 - **Shipping & Handling (Required if applicable)**
NOT applicable for Downloadable Product (*See also **Is downloadable products?***).
NOT applicable when choose to use PayPal Built-In Shipping Calculations. (*See also **Shipping Calculation Method***).
- **Availability**
- **Product Description**
Enter product description that you want to be displayed in the **Product Detail** page.
- **Product Image**
An image added here will be shown as a Main Product-Image on Top-Left of **Product Detail** page. (You can add additional image(s) in More Images tab.)
Note: If you check the check-box to upload image file but did NOT browse to input the file destination, existing image will be overwrite by blank and there would not be a Main Product-Image displayed.
- **Attached Product Document**
Here you can upload an attached Product Document, such as Product Manual, Product Catalog, Product Info., or etc. If you do so, there will be a link for user to download this attachment on **Product Detail** Page. To customize Label of your Attached Product Document, please see **Customize Label for Attached Document and URL(s)**.
Note: If you check the check-box to upload file but did NOT browse to input the file destination, existing will be overwrite by blank and there would not be any attachment for user to download.
- **URL**
There are 2 URLs that you may assign here. You may enter URL of your Product or Company here. Also, this can be used to enter the Demo URL or Trial URL for your software product. If you do so, there will be link(s) for user to access to your URL(s) on **Product Detail** Page. To customize

Label of your URL(s), please see **Customize Label for Attached Document and URL(s)**.

- Authorize
 - Active
Check to activate Product listing to be displayed to all users.
 - Featured Product
Check to make this product a Featured Product. *(See also [New Releases, Best Sellers, Featured Products](#))*
 - Free Shipping
Only applicable when you choose to use an individual transaction-based shipping value. *(See also [Shipping Calculation Method](#))*
NOT applicable for Downloadable Product.
Free Shipping: if checked, Free Shipping Symbol will be displayed in Product Listing and **Product Detail** Page. Also, Shipping & Handling input when add product will not be calculate while check out.

Option																									
<input type="text"/>	<input type="checkbox"/> 																								

All required information in Product Tab has to be added and saved prior to go to this tab.

- **Product Specification:** After you added/saved required field in Product Tab:
 - Select Specification Tab.
 - Enter related information for Specification and Description, then click .
- **Product Option:** This section can be used to add Product Option Selection when you have any product, at the same price, with different

selections, such as sizes or colors. Users will be able to choose their preferred selection from the DropDownList above the list price on **Product Detail** page or listing grid (if enable). To have this feature, “**Enable Product Option Selection (DropDownList)?**” has to be enabled. (See also **Enable Product Option Selection (DropDownList)?**)

3. More Images Tab

Product	Specification	More Images	Others
Product Images: Note: Main Product image can be added on the Product tab.			
View Order	Title	Description	Image
1	Main Page	Main Page	 <input type="checkbox"/> Edit
2	Drill Down	Drill Down	 <input type="checkbox"/> Edit
3	More Images	More Images	 <input type="checkbox"/> Edit
0 *			<input checked="" type="checkbox"/> Upload product image <input type="button" value="Browse..."/> * <input type="button" value="+"/>
Image has been updated.			
YouTube Videos (beta):			
Video	View Order	YouTube Video Link	Description
	0	http://www.youtube.com/v/ljjo6WJjWGI?fs=1&hl=en_US	Internet Marketing <input type="checkbox"/>
	0		<input type="button" value="+"/>
<input type="button" value="Batch Update View Order & Description"/>			
Video has been added.			

All required information in Product Tab has to be added and saved prior to go to this tab.

Images added in this More Images Tab will be shown as a series of small pictures under Main Product-Image in **Product Detail** page. You can add additional images as many as you want here. When Lightbox feature is enabled, Click on any image will open the LightBox to display Images in Slideshow. When Lightbox feature is disabled, Click on any image will open the image in new window. (See also **Enable Lightbox?**)

Also, User can use this section to add YouTube Videos to his/her listing.

Note: **You Tube Video Link** is Value of src and will be in the form of <http://www.youtube.com/embed/Xyy4Zccc0> , can be found from You Tube Embed code

For example:

- From You Tube Website, You Tube Embed code is:
`<iframe width="560" height="345" src="http://www.youtube.com/embed/Udl6rP5shs0" frameborder="0" allowfullscreen></iframe>`
- To input into module's You Tube Videos setting, You Tube Video Link is:
<http://www.youtube.com/embed/Udl6rP5shs0>

○ **To edit product,**

1. Log in as an **Edit Role User**.
2. Navigate to product listing.
3. Click  to edit any product.
4. Select Tab that you want to edit Product Information.

Note: *For Product Image, if you check the check-box to upload image file but did NOT browse to input the file destination, existing image will be overwrite by blank and there would not be a Main Product-Image displayed.

*For Attached Product Document, if you check the check-box to upload file but did NOT browse to input the file destination, existing will be overwrite by blank and there would not be any attachment for user to download.

○ **To delete product,**

1. Log in as an **Edit Role User**.
2. Navigate to product listing.
3. Click  to edit any product.
4. Click **Delete** on the bottom of Product page.

○ **To copy existing product as a new listing,**

1. Log in as an **Edit Role User**.
2. Go to Store Admin Quick Launch section on the top right corner of the module and click **Manage Listings** link
3. Click on the **Copy** button in front of your selected product.
You will then be redirect to a new page with pre populated content. However, this new content will not be saved to the database until you click "**Save as new listing**" on the new page. To avoid confusion, only main information (excluding images, files, reviews, etc) will be copied over.

Manage Listings

This section will allow you to quickly activate, copy, delete, export, make featured, setup content sharing, and generate RSS for your product listings. To get to this section,

1. Log in as an **Edit Role User**.
2. Go to Store Admin Quick Launch section on the top right corner of the module and click **Manage Listings**.
3. Click **Edit** to make some changes to any listing.
4. Click **Update** after finish making changes.

If you want any product to use contents from another product, you can do by assign Product ID, of the product you want to use its contents, into ContentID column. Product ID can be found in parenthesis at the end of each Product Name. From example below, Counter 3.0 Enterprise Edition w/Source (Product ID 26) will be able to use contents from Product ID 22 after setup. (**Note:** Currently, Content Sharing supports only Images, Videos, and Reviews)

- The copy feature will not save to the database until you click "Save as new listing". To avoid confusion, it will only copy main information excluding images, files, reviews, etc.

Manage/Authorize Review

This section will allow you to authorize or delete reviews.

To see if there is any review waiting to be authorized,

1. Log in as an **Edit Role User**.
2. Go to Store Admin Quick Launch section on the top right corner of the module. To see if there is any review waiting to be authorized, check the number of **Authorize Review**. From example below, there are 2 reviews wait to be authorized.

3. To see what products have reviews wait to be authorized, click **Authorize Review**.

To authorize any review, you have two options,

Option 1

1. Navigate to product that you want to authorize review.
2. Click  to edit the product listing.
3. Go to **Other** Tab of the **Edit Product** page.
4. Click **Edit** in the last column of review list.
5. Check the **Auth** Check Box to authorize a review.
6. Click **Update** to complete review authorization.

Option 2

1. Go to Store Admin Quick Launch section on the top right corner of the module and click **Manage Reviews**.
2. From dropdown list, select product that have reviews wait to be authorized.
3. Click **Edit** in the last column of review list.
4. Check the **Auth** Check Box to authorize a review.
5. Click **Update** to complete review authorization.

Manage Download Files

This section will let you upload downloadable files to the system and also associate any of those file to the product, to be available for buyers to download. (See also **Add/Edit Product / Others Tab / Product Downloads**)

To upload files to the system,

1. Log in as an **Edit Role User**.
2. Go to Store Admin Quick Launch section on the top right corner of the module and click **Manage Download Files** link.
3. Click **Manage Download Files** tab.
4. Define name of downloadable file that you're going to upload to the system.
5. Browse to select the file to upload.
6. Check the **Active** Check Box to activate this downloadable file.
7. Click to upload that file to the system.

Coupon Admin

1. Log in as an **Edit Role User**.
2. Go to Store Admin Quick Launch section on the top right corner of the module and click **Category/Coupon Admin**.
3. Click **Coupon Admin tab**.

Once you're on Category Admin page, to set the coupon.

- a. Coupon Code: If Coupon Discount is enable (on Store Configuration page), this coupon code can be used by the customers to apply for discount (%) when checking out the products. This will only apply to the shopping cart not the buy now button.
- b. Coupon Desc: This is Coupon Description.
- c. Item Discount (%): This is the discount (%) that will be given to the customers when the Coupon Code in a. is correctly applied with all the requirements.
- d. Minimum Purchase: This can be used to set the minimum purchase required before the discount (%) in c. will be applied.
- e. Remove After Use: If checked, the coupon will be automatically deleted after it has been used. In other words, this coupon is valid only for one time use.
- f. Expired in (days): Set how many days for the Coupon to stay valid.
- g. Created Date: Date that the Coupon was entered into the system.

Attribute Template

While Login, clicking on the **Attribute Template** on Store Admin Quick Launch section will get users with administrative role to **Predefined Attribute** page shown below. In this page, administrative users will be able to predefine some attributes as default attributes which end users can find in **Specification** section when they post/update any listing (see **Specifications Tab** in **ADD/Edit Product** on the upper part of this documentation).
